RE: Subscriber Notification Report, WC Docket No. 05-196

Dear Ms. Dortch:

At this time, Lancaster Telephone Company d/b/a Comporium Communications ("Comporium") has one recently provisioned customer receiving service over its IP-enabled network platform. In order to comply with the applicable sections of C.F.R. Part 9, Comporium has developed a notification form describing the potential limitations of E911 access on IP-enabled facilities. The notification requires written acknowledgement from the customer. Comporium personnel will hand-deliver the notification form to all IP-enabled service customers, and we are confident in obtaining a 100% acknowledgement rate by August 29, 2005. Comporium personnel will also hand-distribute CPE labels to all three IP-enabled service customers, and will instruct the customers to place the labels at or near the CPE equipment used in connection with interconnected IP-enabled service.

Comporium expects to receive E911 acknowledgements from its VoIP service customer prior to August 29, 2005. However, in the event the customer fails to return an acknowledgement to Comporium before August 29, 2005, Comporium will disconnect the customer's IP-enabled services no later than August 30, 2005. Copies of all acknowledgements will be kept and filed by Comporium's External Affairs Department in Rock Hill, SC.

The compliance contact for Comporium's efforts regarding the *VoIP E911 Order* is,

Greg Lunsford  
Manager - Regulatory Affairs  
Comporium Communications
